2 Linux apps published on the COSMIC Store · 211 commits · 15 releases · MIT licensed

SUMMARY

Computer Science student (B.E., VTU, 2027, CGPA 8.0/10) seeking an IT support or help desk internship in Bengaluru. **Available from January 2027 for a 3–6 month internship.** Two years of daily Linux use across Pop!_OS, Fedora and Linux Mint, covering command-line administration, system and kernel-level troubleshooting, and log analysis to find root causes. Comfortable with TCP/IP, DNS, SSH, HTTP and packet analysis. Shipped two Linux desktop applications to a public app store.

TECHNICAL SKILLS

- **Troubleshooting & Diagnostics:** Linux command-line administration, system and kernel debugging, hardware and software fault isolation, package and dependency resolution, reading system logs
- **Networking:** TCP/IP, DNS, DHCP, HTTP, SSH, packet capture and analysis (Wireshark), connectivity troubleshooting
- **Operating Systems:** Pop!_OS, Fedora (Hyprland), Linux Mint, Kali Linux, Parrot OS; dual-boot and multi-distro setups
- **Systems:** D-Bus, `/sys/class/power_supply`, systemd services, shell scripting
- **Programming & Tools:** Rust, Python, JavaScript, Shell; Git, GitHub, VS Code, Jupyter Notebook

PROJECTS

COSMIC Power Monitor — *Rust, Linux, 2026*

- Published COSMIC Store panel applet showing live battery charge and discharge power in watts; 89 commits, 9 releases, MIT licensed.
- Reads kernel power-supply data from `/sys/class/power_supply` about four times a second, and falls back to computing wattage as current × voltage when the kernel exposes no direct reading.

COSMIC Connect — *Rust, D-Bus, Linux, 2026*

- Panel applet integrating KDE Connect over D-Bus: pairing, file/URL/text sharing, SFTP browsing, clipboard sync and battery status; 122 commits.
- Maintains a patched KDE Connect fork adding four D-Bus signals for live transfer progress and suppressing duplicate notifications.

bluetoothctl-autoconnect — *Shell, expect, Linux, 2026*

- Shell and expect script that reconnects paired Bluetooth devices through `bluetoothctl`, removing a manual step from every device switch.

ClipManager — *Rust, COSMIC Desktop, 2026*

- Clipboard history applet with search, pin-to-top, private mode, and automatic clearing of entries older than 48 hours while preserving pinned items.

hp-cosmic-charge-limit — *Rust, Linux, 2026*

- Battery charge limiter for HP laptops exposing the embedded-controller charge threshold through a COSMIC panel applet.

TRAINING

Ethical Hacking with AI — *Internshala Trainings · Aug–Sep 2025*
VAPT methodology, OWASP Top 10, network protocols, web and mobile attack vectors; scored 84%.

Artificial Intelligence & Cloud Technology — *Edunet Foundation, AICTE-certified · Sep–Oct 2025*
Core AI concepts and cloud deployment workflows.

EDUCATION

Bachelor of Engineering, Computer Science & Engineering — *2023–2027*
Government Sri Krishnarajendra Silver Jubilee Technological Institute (SKSJTI), VTU · Bengaluru · 7th semester · CGPA 8.0/10

CERTIFICATIONS

- Cyber Security 101 Learning Path — TryHackMe (45h 23min) — May 2026
- Pre Security Learning Path — TryHackMe (19h 10min) — Mar 2026
